Re: Product Discontinuation Notice
1754C C-Band DWDM DFB Laser Module with the FC/APC connector option

Dear valuable customer,

This letter is to inform you of EMCORE's intended discontinuation and last time buy notification of the 1754C family with the FC/APC connector option. This notice is not applicable to the 1754C family with the SC/APC connector option. The 1754C family will continue to be offered with the SC/APC connector option indefinitely.

As an ongoing course of business, EMCORE continues to evaluate its active product line to ensure we are delivering market leading products that our valuable customers demand. Due to evolving market conditions, increasing challenges with legacy component supply, and limited manufacturing options, it has been determined that EMCORE's 1754C products with the FC/APC connector are no longer economically viable.

To this end, a limited last time buy opportunity for the 1754C will be available through the end of December 2022 or while supplies last. All final orders must be NCNR and placed on or before 12/23/22, with requested shipment on or before 12/30/22.

It should be noted that the 1754C product family will continue to be available with the SC/APC connector option indefinitely. Customers that have no choice but to use FC/APC are encouraged to source widely available SC/APC to FC/APC adaptors from a reputable 3rd party as needed.

Warranty and post-sales support will continue indefinitely.

Thank you again for your support of EMCORE products. Should you have any questions or need assistance regarding this notice, please do not hesitate to contact me or your EMCORE sales representative directly.

Sincerely,

Grant Olecko
Senior Product Line Director
