

March 4, 2021

Dear Valued Customer:

For many years, customers have depended on Systron Donner Inertial's (SDI) MotionPak® Multi-Axis Inertial Sensing System. Now, due to declining demand for this mature product and the obsolescence of the purchased accelerometer; SDI has initiated a last time buy of the accelerometer used in the MotionPak® to support our mutual business through 2022 or when the obsolete accelerometer is consumed, whichever time comes first.

There is no accelerometer alternative or redesign or replacement of the MotionPak® planned.

We at SDI truly appreciate your loyal MotionPak® business. SDI will do everything we can to maintain MotionPak® production capabilities through 2022 on a first in first out (FIFO) order basis.

Please consult with your SDI-EMCORE Sales and Marketing Manager about any questions you have.
